Database Collections (Tables)

Key / Role	Collection Name / Description
system_user	system_users
departments	departments
staff_cars_reserved	staff_reserved
emergency_reserved_cars	vistors_reserved
daily_parking_records	parking_slots
daily_parking_records_history	parking_slots_history
service_delivery	service_delivary

User Roles

Key / Role	Collection Name / Description
system_admin	
receptionist	
head_of_department	
department_employee	
vehicle_registra	

System Users Table

Field	Type / Description
full_name	String
telephone	String
identification.type	String
identification.number	String
picture	String

gender	String
title	String
email	String
department_name	String
department_id	String
password	String
access_control.is_locked	Boolean
access_control.reason	String
access_control.last_login_attempt	Number
auth.access_token	String
roles.role_name	String
roles.permissions	Array
is_active	Boolean
created_date	Date (ISO)
registered_by	String

Departments Table

Field	Type / Description
department_name	String
department_id	String
created_date	Date
department_leader	String
total_employees	Number
registered_by	String

Staff Reserved Cars Table

Field	Type / Description

plate_number	String
identification	String
owner_name	String
department_name	String
is_active	Boolean
registered_by	String
is_flagged	Boolean

Emergency Reserved Cars Table

Field	Type / Description
total_reserved_space	Number
visitor_info[].plate_number	String
visitor_info[].driver_name	String
visitor_info[].driver_identification.type	String
visitor_info[].driver_identification.number	String
visitor_info[].telephone_number	String
visitor_info[].is_flagged	Boolean
validity.from	Date
validity.to	Date
registered_by	String

Daily Parking Records Table

Field	Type / Description
plate_number	String
driver_identification.type	String
driver_identification.number	String
driver_name	String

driver_telephone	String
status	active / completed
driver_type	staff / visitor / regular
slot_number	String
check_in	DateTime
check_out	DateTime
duration	String
is_flagged	Boolean
checked_in_by	String

Service Delivery Table

Field	Type / Description
identification.type	String
identification.number	String
full_name	String
telephone	String
email	String
department_name	String
department_id	String
date	Date
gender	String
durations.service_duration	String
durations.entry_duration	String
durations.emergency_duration	String
items	String
status	pending / inprogress / transfered / completed

notes	Array
registered_by	String

Audit Table

Field	Type / Description
action	String
time	DateTime
description	String
user_id	String
